Mobius and Esker Partner Around Enterprise Content Management Technologies

Users gain enhanced options for automated information delivery

RYE, NY – April 4, 2001 – Mobius Management Systems, Inc. (Nasdaq: MOBI), a leading provider of software for managing and presenting enterprise content, and Esker Inc., a provider of software for intelligent information delivery, have entered a worldwide marketing alliance to help enterprises manage and deliver content more effectively by applying the multi-channel delivery capabilities of Esker's Pulse™ to information managed by Mobius's ViewDirect® software. ViewDirect captures output from multiple applications and sources, creating an integrated repository of documents, reports and images for delivery over the Internet and corporate networks. Pulse automatically routes information from multiple data sources, in multiple formats, through multiple messaging infrastructures, to recipients throughout the enterprise.

The alliance allows customers of both companies to benefit from the integration of the two products, providing a comprehensive solution for capturing, indexing and storing massive numbers of documents, reports and images in multiple formats and delivering them to any

number of users via multiple channels, including Web, e-mail, fax and wireless technologies.

“The e-business revolution created a need for companies to implement electronic methods of delivering information to the intended recipients,” says Steve Broadway, vice president of marketing planning at Esker. “This partnership addresses an issue many enterprises are struggling with – how to easily deliver large volumes of information from corporate repositories through multiple channels. Pulse can enhance the value of information stored in ViewDirect by delivering it using the transport methods preferred by recipients, substantially reducing the cost of delivering essential documents such as reports, invoices, bills and statements, while providing a customer service advantage to the enterprise.”

“ViewDirect addresses a critical issue for successful e-business initiatives,” said Glenn Lombardi, vice president of business development at Mobius. “It captures, indexes and stores all documents or reports associated with enterprise resource planning (ERP) and other back-office systems and makes them available to front-office systems such as customer relationship management (CRM), portals, customer service and e-presentment and payment. ViewDirect seamlessly interfaces with Pulse to distribute information to users throughout the enterprise. We are delighted to partner with Esker to provide our mutual customers with a complete solution for managing and delivering information.”

About Esker

Esker software enables intelligent access to and delivery of core business information from any data source, in any format, to any recipient. Organizations use Esker software to streamline information exchange, open new channels of communication, and achieve business objectives with new levels of speed and efficiency. Esker extends the reach of information technologies and shortens the distance between people and information. The company’s products include:

- Corridor for Active Server and Corridor Wireless for legacy applications extension
- Persona® for web-to-host connectivity
- Pulse™ and Faxgate for Intelligent Information Delivery
- SmarTerm® for PC-based host access
- Tun® Plus for PC-to-host, web-to-host, and multi-user Windows connectivity

The company was founded in 1985 and is traded on the French Stock Exchange (Le Nouveau Marché: 3581). In 1999, the company achieved sales of \$29.4 million – a 44% increase over 1998. In September 2000, Esker finalized an agreement to acquire VSI, a California-based developer of fax server solutions. Esker’s operations span North America, South America, Europe, and Asia/Pacific with about 300 employees and an installed base of two million licensed users worldwide. About Mobius

Mobius Management Systems, Inc. (www.mobius.com) is a leading provider of Web-based software for managing and presenting enterprise content. The Company's products support a broad range of e-business and application requirements, including customer relationship management, enterprise resource planning and electronic bill presentment and payment. ViewDirect® products store and integrate documents of different formats, presenting and distributing them to employees, customers and business partners over the Internet and corporate networks. Click-n-Done™ provides a "next generation" electronic bill presentment and payment solution that supports all e-billing models.

Mobius products are used by more than one million customers and employees of nearly 1,300 organizations worldwide. More than half of the Fortune 100 companies use Mobius software. The Company, founded in 1981, is headquartered in Rye, New York, with eleven domestic offices, as well as foreign subsidiaries in England, France, Germany, Italy, Sweden, Switzerland, Benelux, Australia and Japan.

Statements contained in this release may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve risks and uncertainties. In particular, any statements contained herein regarding expectations with respect to future sales and profitability, as well as product development and/or introductions, are subject to known and unknown risks, uncertainties, and contingencies, many of which are beyond the Company's control, which may cause actual results, performance, or achievements to differ materially from those projected or implied in such forward-looking statements. Important factors that might affect actual results, performance, or achievements include, among other things, overall economic and business conditions, the demand for the Company's goods and services, including budget allocations for new software products especially within larger corporate environments which have traditionally licensed the company's products, technological advances and competitive factors in the markets in which the Company competes, including price competition from products providing similar functionality to Mobius' products as well as competition for experienced, seasoned employees (including retention) to support the company's key business operations, ongoing product development and growth, and acceptance and or adoption of the company's new internet products and services. These risks and uncertainties are described in detail from time to time in Mobius' filings with the Securities and Exchange Commission, including its Quarterly Report on Form 10-Q, filed on February 14, 2001. Mobius accepts no obligation to update these forward-looking statements and does not intend to do so.
