

## In a Budget-Driven, Results-Oriented IT Environment, Cloud-Based Document Process Automation is a Welcome Solution

*Document process automation leader and SAP® software solution and technology partner Esker to highlight cloud-based document process automation solutions for use with SAP applications at SAP TechEd 2011 Las Vegas*

**LAS VEGAS – Sept. 13, 2011** – In today's IT environment where budgets are shrinking, demand for immediate return on investment is growing and IT infrastructures are becoming increasingly burdensome, cloud-based solutions can free up IT resources, reduce costs and streamline the IT landscape. It's the reason Esker, the leader in document process automation solutions and an SAP® software solution and technology partner, is highlighting the benefits of its comprehensive SaaS platform at the SAP TechEd 2011 conference being held in Las Vegas through Sept. 16.

"Now more than ever, IT professionals are under pressure to deliver more with less," said Steve Smith, U.S. chief operating officer, Esker. "Esker solutions help them do just that by simplifying the IT landscape with a single solution capable of automating multiple processes, including accounts payable, accounts receivable, sales order processing and fax and mail services. And because our solutions are available via SaaS, organizations can realize rapid return on investment without placing additional demands on their IT departments."

During SAP TechEd 2011, Esker will be exhibiting in booth 314, and representatives will be available to answer attendees' questions about best practices for rolling out new cloud-based solutions. As an SAP software solution and technology partner, Esker experts can explain how Esker solutions work together with SAP software to eliminate the manual processing of documents and deliver added value. In addition, they will discuss how IT professionals can benefit from a single-source document process automation solution.

"A streamlined IT infrastructure reduces the potential for problems," said Smith. "The piecemeal implementation of document process automation can create conflict within your system. Esker offers a complete suite of automation solutions, including solutions that have achieved certified integration with SAP applications, to optimize your environment."

On top of expert advice, conference participants visiting the Esker booth will be able to request informational white papers, pick up a pair of always-popular flashing sunglasses, and learn about the success stories of customers using

(continued)

Esker solutions. "We have attended SAP TechEd for many years and have always found it extremely beneficial," added Smith. "We're eager to add to the educational value of the event by sharing our knowledge with conference participants."

## About Esker

Esker is the worldwide leader in document process automation solutions. Addressing all types of business processes from accounts payable and accounts receivable to sales order processing and procurement, Esker cloud computing solutions enable companies to automate the reception, processing and sending of any business document with one platform. Esker helps over 80,000 companies across the world to reduce the use of paper and eliminate manual processes while improving their productivity, efficiency and environmental impact.

With 33 million euros in sales revenue in 2010, Esker operates in North America, Europe and Asia Pacific with global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin. Esker is listed on the NYSE Alternext in Paris (Code ISIN FR0000035818). For more information, visit [www.esker.com](http://www.esker.com).
