

Esker Receives Safe Harbor Certification

Madison, WI – October 31, 2011 – Esker, the leader in document process automation solutions, announced today that it is among a select group of organizations that have attained the U.S. Department of Commerce Safe Harbor Certification for its on-demand document process automation platform. The Safe Harbor provides a framework and legal protection allowing for the safe transfer of personal data from European countries to the U.S. By certifying to the Safe Harbor, companies assure that European Union (EU) organizations are aware that the business provides adequate privacy protection as required by the EU Directive on Data Protection.

The U.S. - EU Safe Harbor Framework was developed by the U.S. Department of Commerce in consultation with the European Commission to bridge the different data privacy approaches between the U.S. and European Commission's Directive on Data Protection. The framework provides an efficient means for U.S. organizations to comply with the Commission's Directive.

In order to be Safe Harbor Certified, organizations must comply with the seven Safe Harbor principles covering: notice, choice, transfers to third parties, access, security, data integrity and enforcement. These principles are intended to give individuals more control over the accuracy and transfer of personal data. By certifying to the Safe Harbor, U.S. companies avoid interruptions in their business dealings with the EU or avoid possible prosecution by European Data Protection Authorities.

“Esker has always maintained the highest levels of data privacy and pledges to continue to protect the security and privacy of any personal information that its customers, employees, partners and others provide,” said Jean-Michel Bérard, CEO and President of the Board of Directors, Esker. “Today cross-border global business is commonplace and data privacy practices must be harmonized between continents. The Safe Harbor Certification provides us with the formal opportunity to demonstrate our competence in protecting the confidentiality and privacy of personal data.”

Esker has also been awarded TRUSTe's Privacy Seal signifying that the Safe Harbor Privacy Policy and Esker's practices have been reviewed for compliance with TRUSTe's program requirements including transparency, accountability, and choice regarding the collection and use of personal information. As a leading independent third party online privacy solutions provider, TRUSTe's privacy seal is recognized and trusted by millions of consumers as a sign of responsible privacy practices with the highest standards for protecting personal information.
