Esker Unlocks Gates to Document Delivery Paradise for Lotusphere® Attendees

Leading document automation solutions add hosted faxing, and other delivery options for IBM Lotus Notes and Domino – even postal mail

ORLANDO, Fla., January 23, 2006 – Esker Software, a leading provider of intelligently automated document delivery solutions and services, will participate this week in the Lotusphere® 2006 Product Showcase, demonstrating its portfolio of solutions aimed at optimizing business communications within the IBM Lotus Notes and Domino® environments. In addition to exhibiting its technology, Esker will hold a drawing for five Esker Fax or Esker Fax for Notes fax servers, including one year of support – a \$6,000 value for each prize. The Esker booth number is 703.

Esker solutions has tailored solutions to enable enterprises that use Lotus Notes or Domino to automatically deliver business documents using virtually any output transport media, including hosted fax services that eliminate the need for telephony and hardware. Esker on Demand for Office and Esker on Demand for salesforce.com AppExchange, even enable users to output documents to a mail processing facility where they are printed, stamped, addressed, inserted and sent, affording organizations of any size a completely scalable, virtual mailroom without overhead costs.

Esfer Fax for Notes, which includes image recognition and data extraction capabilities as well as IBM Lotus iNotes® support and other new features, provides a direct migration path to Esfer DeliveryWare Platform. Esfer DeliveryWare uses rules-based technology to automate the capture, formatting, and delivery of business documents via XML, web, archive, wireless, and print — in addition to fax and email, all fully integrated with Lotus Notes and Domino.

“We are eager to not only show Lotusphere attendees how our technology works, but also to share with them all their peers’ success stories that we’ve gathered in the year since we launched Esfer Fax for Notes,” said Renee Thomas, Director of Field Marketing, Americas, Esfer Software. “Businesses worldwide use this offering to quickly automate important business processes without rebuilding their IT infrastructures, and we’re eager to show others how they can do the same.”

About Esfer Software

Esfer is a recognized leader in helping organizations streamline manual, paper-intensive process and reduce the use of paper by automating the flow of documents into, within and outside the organization. With patented document delivery automation software (**Esfer DeliveryWare**) and hosted document delivery services (**Esfer on Demand**), Esfer offers a total solution to automate every phase and every type of business information exchange. Customers gain significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months. Founded in 1985, Esfer operates globally and has over 70,000 customers and millions of licensed users worldwide. Esfer has global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin.
