Esker Software Plays Dual Role of Educator and Gold Sponsor at ASUG Annual Conference and Vendor Fair

SAP customers count on Esker for its leadership in document delivery automation

MADISON, WI – April 29, 2005 – Esker Software, the leading provider of automated document delivery solutions and services, announced today its Gold-level sponsorship of the 2005 Americas' SAP Users' Group (ASUG) Annual Conference and Vendor Fair, May 1-4 at the Anaheim Convention Center in Anaheim, CA. In addition to the company's contribution as an event sponsor, Esker Executive Vice President of Business Development, Mitch Baxter, will lead a session entitled "Best Practices in SAP Document Delivery," to be presented, May 1, at 5:15 pm PT. Esker also will co-host a customer and ASUG chapter appreciation night at House of Blues on Monday night, at 7:30 pm in conjunction with RJT Compuquest, an Esker Certified Partner.

ASUG is the world's largest independent, not-for-profit organization of SAP customer companies and partners in the world. This is the fifth year Esker has participated in the conference, demonstrating the company's long-standing commitment to the SAP market.

"Esker has dedicated itself to supporting the vital community of SAP customers, not just through sponsorships, but also by providing continual educational opportunities via ASUG at both national gatherings and at the regional chapter level," said Baxter. "This hands-on approach to helping SAP customers by sharing best practices with those 'in the trenches' is one of the reasons more SAP-enabled companies turn to Esker each day."

As an SAP Software Partner with certified integration, Esker provides advanced capabilities for managing content and delivering documents directly from SAP solutions to hundreds of large enterprises worldwide. Esker was also selected as the third-party technology behind the automated fax and e-mail solution included in the SAP Packaged Services program, a fixed-price, fixed-scope solution package.

Esker was chosen because of its depth of knowledge in using and applying SAP-endorsed integration technologies. This track record of success has helped Esker DeliveryWare become widely recognized as the document delivery solution of choice among SAP customers and contributed to 63% growth among Esker's SAP customer client base during 2004.

"It's a worldwide objective of Esker to provide the best document automation solution possible for SAP users – a solution that provides real value in terms of efficiency and cost savings almost immediately upon implementation," said Baxter. "We make it easy for customers to extend the value of their SAP investment through seamlessly integrated, multi-channel document delivery."

About Esker Software

Esker is the leading provider of intelligent document delivery solutions – software and hosted services automating every phase of document delivery. Esker helps organizations streamline manual, paper-intensive business processes such as purchasing, invoicing and sales order processing, with Esker DeliveryWare, a single and universal information exchange platform that captures, formats, converts and routes documents – automatically – from any enterprise application.

Esker DeliveryWare has clear advantages over other document delivery solutions:

- ◆ It recognizes, formats and converts more file formats than any other solution.
- ◆ It provides the broadest range of delivery media – built-in – of any solution, including Esker on Demand outsourced fax and physical mail services.
- ◆ It is the only solution with the DeliveryWare Rules Engine: patent-pending intelligence that directs document transformation and flow based on content recognition, eliminating the need for custom programming.

With its combination of flexibility and simplicity, Esker DeliveryWare provides significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months.

Founded in 1985, Esker operates globally and has over 70,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, WI. For more information, visit www.esker.com.
