Esker Adds Additional Support for Faxing with Brooktrout Real-Time Fax over IP Technology

Customers can maximize IP infrastructure value using Esker solutions integrated with Brooktrout fax boards

Madison, WI, July 18, 2005—Esker Software, a leading provider of intelligently automated document delivery solutions, today announced the addition of Brooktrout real-time fax over IP to its supported technologies, allowing customers to take full advantage of their IP infrastructures. Esker DeliveryWare and Esker Fax solutions now offer customers even greater potential to reduce fax communication costs by integrating Brooktrout's latest technology to benefit from both speed and FoIP capabilities.

The addition of Brooktrout TR1034 intelligent fax boards to Esker DeliveryWare or Esker Fax gives customers the ability to integrate real-time fax over IP with their VoIP networks, allowing customers to run a public switched telephone network (PSTN) solution today and migrate to an IP-based system in the future as their needs evolve. With faster connections and more reliability in delivering documents from enterprise applications, Esker customers can maximize their efficiency and productivity.

“When developing new solutions, our primary concern is to help customers reduce their document delivery and information management costs,” says Catherine Dupuy, Esker DeliveryWare Project Manager at Esker Software. Catherine continues, “Adding FoIP capabilities to Esker solutions directly answers those needs.

(more)

“The ability to directly integrate our existing Esker Fax solution with our IP voice and information infrastructure - without buying extra equipment - affords us a significant cost advantage and extends the power of our VoIP networks,” says Alberto Monciatti, Environmental Distribution Division Manager at Consorzio Operativo MPS, Italy. “The use of real-time fax over IP is quickly spreading to our customers and partners.”

About Esker Software

Esker is the intelligent document delivery leader. With software and hosted delivery services to automate every phase and every type of document delivery, Esker helps organizations streamline manual, paper-intensive business processes and automate the flow of documents into, within and outside the organization providing significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months.

Esker intelligent document delivery solutions include **Esker DeliveryWare** – a single, universal information exchange platform that captures, formats, converts, routes and stores documents using patented, content-based delivery technology and **Esker on Demand** – document delivery services enabling physical mail, fax, email and SMS delivery from enterprise and desktop applications with no printers, mailroom equipment, fax machines, office supplies, etc.

Founded in 1985, Esker operates globally and has over 70,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, WI. For more information, visit www.esker.com or www.eskerondemand.com.
