

Esker User Conference Draws Record Attendance

Leading industry analyst to discuss maximizing content, processes and infrastructure to enhance customer relationships

Madison, WI and Scottsdale, AZ, April 25, 2006 – Esker, the leading provider of business document delivery solutions, today kicked off its 2006 Esker User Conference at the Caleo Resort in Scottsdale, Arizona, expected to draw more attendees than any previous event for Esker in the United States. Spanning four days, the conference will provide a wide variety of training and networking opportunities for document specialists, while showcasing Esker DeliveryWare 4.0, the latest version of the company's industry-leading end-to-end document process automation solution released last month.

As part of his opening remarks, on Wednesday, April 26, Esker's CEO, Jean-Michel Berard will present Esker's long-term vision for continuing to evolve its product offerings as well as an update regarding current product development.

Later in the morning, leading industry analyst and Gartner Research Vice President Kenneth Chin will present market trends and predictions on the future of the document delivery market. With over 20 years of experience in the IT field, Mr. Chin is Gartner's lead analyst covering integrated document archive and retrieval systems (IDARS), distributed output management (DOM) and records management.

The user conference will also mark the launch of new corporate positioning for Esker. Attendees will be greeted with the new Esker branding on the first day of the conference, complete with a new corporate logo. The new positioning more precisely portrays its core strength of providing the best all-around document delivery solutions in the marketplace.

"The user conference provides our customers with the chance to preview new products, get advice on how to leverage new features and hear first-hand from their peers about ways to expand the use of Esker technology to help more proactively manage their document-related business processes," said Mike Wenzel, Vice President of Americas Sales. "Just as important, the event also gives us the chance to collect valuable feedback about our products and services. We believe that our commitment to listening closely to this feedback is what has enabled us to gain our leadership position in the document delivery market."

About Esker

Esker is a recognized leader in helping organizations streamline manual, paper-intensive processes and reduce the use of paper by automating the flow of documents into, within and outside the organization. With patented document delivery automation software and hosted document delivery services, Esker offers a total solution to automate every phase and every type of business information exchange. Customers gain significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months. Founded in 1985, Esker operates globally and has over
