RJT Compuquest and Esker Software announce business solutions to simplify document process automation for SAP customers

Partnership of SAP solution “gurus” answers needs for automated e-billing, inbound orders, mail, fax

Orlando, FL – March 14, 2005 – Esker Software, the leader in SAP document delivery automation, and RJT Compuquest (RJTC), a premier SAP-focused consulting firm and an Esker National Certified Partner, today announced the launch of Business Solutions for SAP at SAP Financials 2005, the definitive event for SAP financials, accounting, controlling, planning, compliance and reporting. Combining SAP-certified Esker DeliveryWare integration with professional services from RJTC, the packages are designed to offer SAP customers simple solutions addressing specific needs for automation of document processes — e-invoicing and e-payments, inbound purchase orders, and outsourced mail or fax — to improve cash collection, eliminate manual data entry, and reduce business communication costs.

Business Solutions for SAP are the fruit of a formal partnership that Esker and RJTC entered into in 2003, bringing to the market a unique depth of expertise in enhancing and automating SAP implementations. “The purpose of our partnership is to provide value-add solutions that drive more functionality and ROI from SAP systems,” said Mike Bell, vice president of RJTC. “In identifying products and services to help SAP customers increase efficiency within their business processes, we found what we were looking for in Esker DeliveryWare.”

Esker DeliveryWare adds value to SAP implementations by integrating automated fax, email, print, wireless, XML, and web document delivery with the system, including storage and retrieval capabilities, to centralize and streamline document communications. According to Bell, “Our customers recognized the potential of Esker DeliveryWare and began requesting additional functionality. The RJTC and Esker development teams listened and worked together to create the Business Solutions. We’re delighted with the result and confident our customers will be equally excited. Esker proved to be an excellent partnership that we look forward to expanding.”

(more)

“RJT Compuquest has demonstrated a strong commitment to Esker and the Esker DeliveryWare solution,” added Diane Jensen, channel sales manager at Esker. “RJTC’s deep knowledge of the SAP market, combined with their strong commitment to our partnership, has contributed to significant growth in our SAP-focused offering. We are proud to partner with RJTC in offering cutting-edge, exclusive business solutions.”

Among the many customers who have benefited from the Esker-RJTC partnership is MonierLifetile, the largest manufacturer of premium-quality roof tile in the United States. “For a long time, we had desired the capability of delivering documents by email directly from our SAP system,” said Walt Hadzinsky, CIO at MonierLifetile. “As we were planning for an upgrade, we evaluated our options for email delivery, and were pleased to discover Esker DeliveryWare. Not only did the platform serve our email requirements, it also had the faxing capabilities that we needed. In coordination with RJTC, we incorporated Esker DeliveryWare into our upgrade plan and consolidated emailing and faxing out of our SAP system. This has been a huge benefit for the business, and a win for IT.”

About RJT Compuquest, Inc.

RJTC is an IT consulting organization based in Southern California since 1996 and focused on providing IT professional services and third-party resources to clients across the United States. RJTC supports client base that includes companies in energy, manufacturing, retail, wholesale, service, and financial industries. Ongoing market development, combined with strong customer relationships and a business philosophy based on exceeding client expectations, position RJTC as a stable, profitable organization committed to long-term growth. Together with its partners, RJTC offers an array of services in SAP solutions, Oracle applications, client-server, hosting, and help desk support direct to clients.
