Esfer Answers Market Need for Quick-to-Implement, Low-Risk Document Delivery Solutions

Esfer delivers an innovative, affordable approach to automating key business processes

Madison, WI, August 16, 2005—Esfer Software, a leading provider of intelligently automated document delivery solutions, today announced the release of Esfer DeliveryWare Business Solutions designed to simplify document delivery automation offering a focused, comprehensive, quickly-delivered and risk-free solutions. Aggressively priced to meet market needs, each solution focuses directly on a specific business process to deliver rapid efficiency gains for immediate additional value with minimal risk. Offering several pre-defined solutions, each Esfer business solution includes all the elements necessary to quickly implement and configure including software and license, knowledge transfer, support and maintenance during the first year, as well as free consultation.

“Companies often overlook business processes like sales order processing, web-enabled invoicing and mail and fax delivery as they pursue internal initiatives to improve operational efficiency,” said Eric Bussy, Director of Corporate Marketing, Esfer Software. “However, removing manual tasks from these functions by using Esfer solutions for automation can provide one of the most effective and rapid means by which to significantly reduce costs and better utilize resources.”

(more)

The Esker DeliveryWare Business Solutions suite allows companies to immediately identify the solutions they need based on the types of document-driven processes they wish to automate. Esker offers a tailored offering for a variety of processes and each solution is:

- Focused – Designed to fix a specific document delivery problem encountered by an organization.
- Comprehensive – All the elements needed to fix the document delivery issue are included; software and licensing, knowledge transfer, and free consultation.
- Quickly Delivered– Full implementation in less than 2 weeks.
- Risk-Free – Integrates seamlessly with current business applications requiring no programming.

Esker DeliveryWare Business Solutions

E-Invoicing Business Solution

Eliminating paper invoicing, the E-Invoicing Business Solution reduces the cost of delivering invoices by more than 45% and shortens the Day Sales Outstanding (DSO).

Document Formatting Business Solution

The Document Formatting Business Solution creates professional looking output directly from enterprise applications using automated document formatting. Users can quickly consolidate information from several back-office sources cutting form-development time up to 90%.

Multi-Channel Document Delivery for SAP and Oracle Solutions

With Multi-Channel Document Delivery for SAP or Oracle Solutions, companies send and receive fax and email directly from their ERP applications increasing speed, accuracy and reliability allowing companies to save up to 90% on document delivery. Esker offers uniquely the benefit of fax outsourcing during peak periods.

Sales Order Processing Business Solution

The Sales Order Processing Business Solution automates sales orders by extracting order detail directly from any source, such as scanner, fax or email, effectively eliminating processing errors, improving order-fill levels and increasing customer service satisfaction while reducing order processing time up to 80%.

Storage and Retrieval Business Solution

The Storage and Retrieval Business Solution provides companies with the ability to store, search, retrieve and track all documents sent from enterprise applications while reducing costs of manual filing and physical document storage, and ensuring accurate document retention.

(more)

“Over the past several years, companies have been increasingly interested in better automating document-related business processes, but found that doing so required significant investment and cumbersome implementations,” said Catherine Dupuy, Product Manager for Esker Software. “In response, we drew from our knowledge and expertise to create a unique offering that gives companies a way to swiftly repair or enhance the automated delivery of the documents generated by their enterprise applications – without hiring programmers or overspending on new infrastructure.”

About Esker Software

Esker is the intelligent document delivery leader. With software and hosted delivery services to automate every phase and every type of document delivery, Esker helps organizations streamline manual, paper-intensive business processes and automate the flow of documents into, within and outside the organization. Customers gain significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months.

Esker intelligent document delivery solutions include **Esker DeliveryWare** – a single, universal information exchange platform that captures, formats, converts, routes and stores documents using patented, content-based delivery technology and **Esker on Demand** – document delivery services enabling physical mail, fax, email and SMS delivery from enterprise and desktop applications with no printers, mailroom equipment, fax machines, office supplies, etc.

Founded in 1985, Esker operates globally and has over 70,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, WI. For more information, visit www.esker.com or www.eskerondemand.com.
