Esker Software to Help FileNet Users Win Big in Las Vegas

FileNet Partner and Document Delivery Automation Leader to Exhibit at 19th Annual User Conference

FILENET USER CONFERENCE, LAS VEGAS, NEV. – November 7, 2005 – Esker Software, the leading provider of intelligently automated document delivery solutions and services, will take part in FileNet's 19th annual Americas and Asia Pac user conference, starting today at Caesars Palace in Las Vegas, Nevada. A key exhibitor at the conference, Esker was also named in May as a FileNet ValueNet technology ISV partner. The Esker document automation offering enhances FileNet users' ability to access and deliver documents and document content, including documents in enterprise systems such as SAP.

FileNet's User Association, called UserNet, brings together FileNet and its global customers to create an opportunity for close interaction between UserNet members and FileNet executives. Esker's participation in this year's conference affirms both its commitment to the ValueNet partner program and to engaging FileNet customers in an active dialogue to help anticipate future needs.

"We are eager for the opportunity to interact on a one-to-one basis with FileNet end-users, not only to demonstrate how our offering can enhance the investments they've already made in FileNet technology, but also to get first-hand a sense of the emerging demands of the user group," said Mitch Baxter, Executive Vice President of Business Development. "Our partnership with FileNet makes a great deal of sense as both FileNet and Esker share the same goal – improving operational efficiency by creating more intelligent ways to share information."

The document automation functions of Esker DeliveryWare, when combined with the Enterprise Content Management (ECM) capabilities of FileNet P8, provide customers with enhanced document retrieval

(more)

capabilities. Esker DeliveryWare integrates with FileNet P8 and its Application Connector for SAP to capture key indexing fields from inbound mail, fax e-mail and print as well as documents related to SAP-solution based transactions. This information is then passed to FileNet P8 where users can access documents and document content by enhanced search criteria. Both Esker and FileNet are SAP Partners with certified integration.

In addition to enhanced document retrieval, FileNet P8 users can also take advantage of Esker DeliveryWare to manage the delivery of documents from FileNet P8 via fax, physical mail, e-mail, print, web publishing, mobile message and XML.

“FileNet customers have responded extremely positively to our offering because today’s enterprises are looking for solutions that simultaneously enable them to both quickly overcome a business process challenge and lay the groundwork for greater long-term operational efficiency,” added Baxter. “For FileNet users, Esker DeliveryWare does just this – creating a single platform for all document traffic, bringing in all documents coming from SAP into FileNet and from FileNet to customers, employees and business partners.”

About Esker Software

Esker is the intelligent document delivery leader. With software and hosted delivery services to automate every phase and every type of document delivery, Esker helps organizations streamline manual, paper-intensive business processes and automate the flow of documents into, within and outside the organization. Customers gain significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months.

Esker intelligent document delivery solutions include **Esker DeliveryWare** – a single, universal information exchange platform that captures, formats, converts, routes and stores documents using patented, content-based delivery technology and **Esker on Demand** – document delivery services enabling physical mail, fax, email and SMS delivery from enterprise and desktop applications with no printers, mailroom equipment, fax machines, office supplies, etc.

Founded in 1985, Esker operates globally and has over 70,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin. For more information, visit www.esker.com or www.eskerondemand.com.
