

Esker Launches FlyDoc at 2006 AIIM On-Demand Conference, Offers Month of Free Mail Processing

Esker to present enhanced offering for sending enterprise-quality fax and postal mail from any computer, without capital investment

Madison, WI and Philadelphia, PA – May 16, 2006 –Esker, the leading provider of business document delivery solutions, today announced the launch of FlyDoc, an enhancement of its web-based, desktop document delivery service formerly known as Esker on Demand for Office, at the 2006 AIIM On-Demand Conference and Exposition in Philadelphia. FlyDoc adds enhanced monitoring and reporting functionality to further strengthen a service that has provided comprehensive fax, postal mail and email distribution capabilities to hundreds of companies since 2004. The service requires no prohibitive set-up costs or equipment investment, and as part of the launch of FlyDoc, new customers who sign up by June 15, 2006 will be provided free mail processing for the first month of their contracts, paying only for standard postage costs.

“We’ve been helping some of the world’s largest companies improve their document delivery processes for over a decade. FlyDoc will help us extend that leadership to the many smaller businesses that want the efficiency and scalability that the big guys have proven can be achieved,” said Mike Wenzel, Vice President of Americas Sales, Esker. “By providing a free trial, we’re also making the decision to pursue that kind of efficiency even more risk-free and easy.”

In addition to service enhancements, Esker has repositioned the offering through the FlyDoc brand to better highlight its core strengths - power and convenience. FlyDoc provides the benefits of a fax server and a mailroom without the normally associated capital investment. With FlyDoc, electronic documents are sent directly from the user’s desktop applications such as Microsoft Office. The documents enter FlyDoc’s worldwide network of mail and fax facilities, where they are transformed into postal mail and faxes and sent automatically. Users can monitor progress via a web interface available 24/7/365 and can call upon live technical support at no additional charge. In addition to significant time savings, on average, organizations using FlyDoc can reduce their out-of-pocket costs for sending traditional mail by as much as 45%, and for transmitting faxes by as much as 90%.

Today at 3:30 pm, Esker Sales Manager Greg Collins will lead a special session for AIIM attendees where he will unveil the new service, discussing the ease of desktop faxing, creating hassle-free mailings and promoting powerful email marketing through the use of FlyDoc. The presentation will include a guided peek at the new service, including a live demonstration on how to monitor jobs and run reports with the FlyDoc Manager.

“AIIM On-Demand is the perfect place for us to unveil FlyDoc. The attendees here understand the importance of a good process for delivering electronic documents, and we think they’ll be eager to hear about a really easy way to do it without breaking the bank,” said Wenzel.
