Esker offers flexibility to VSI-FAX[®] users with new Fax on Demand Connector

Esker VSI-FAX users can expand their fax capacity without additional hardware or phone lines, solve peak capacity problems, and benefit from an additional failover option

Madison, WI, December 21, 2004 – Esker, the leading provider of fax solutions and services, has developed a Fax on Demand Connector for their VSI-FAX product to send faxes through Esker's outsourced fax service, Fax on Demand. This service offers highly efficient and cost-effective fax processing without additional hardware or telephony. The Fax on Demand Connector is available as an optional add-on for Esker VSI-FAX.

The benefits of Fax on Demand include:

- Expand fax capacity without additional hardware or dedicated phone lines
- Provide an additional failover option
- Solve peak capacity problems such as end -of-month invoicing

Karen Roscoe, product manager for Esker Fax Server Solutions, explains “Esker's Fax on Demand service fits in well with the current trend towards on-demand information technology. In the long term, Fax on Demand will make it possible to phase out costly fax machines, fax boards, equipment maintenance, dedicated fax lines, and telephony charges.”

Esker's Fax on Demand is a pay-per-page service, so customers pay for what they use. Fax on Demand delivers a rapid return on investment through:

- ◆ Cost control through per-usage billing
- ◆ Productivity gains by eliminating manual handling of documents (printing then manually faxing)
- ◆ Elimination of hardware and telephony maintenance costs

- ◆ Added flexibility and optimized management of peak activity, such as transmitting invoices at the end of the month, with increased capacity available 24/7
- ◆ Fax communication control with real-time delivery confirmation
- ◆ Infrastructure simplification — fewer printers, photocopiers, fax machines, and fax lines

About Esker Software

Esker is a recognized leader in helping companies eliminate manual paper processes with Esker DeliveryWare, a comprehensive solution that automates every phase of business document creation and delivery. Specializing in automating the transformation and distribution of output from SAP[®] systems, Esker solutions also work with any other business application to streamline and automate document flow without custom programming. Customers gain significant operational efficiencies, save time and costs, and realize ROI in as little as three to six months.

Founded in 1985, Esker operates globally and has over 72,000 customers and millions of licensed users worldwide. Esker global headquarters are in Lyon, France and U.S. headquarters are in Madison, Wisconsin. For more information, visit <http://www.esker.com>.
