

## Esker to Demonstrate Document Automation Solutions at Microsoft Tech·Ed 2006

*Esker DeliveryWare, Esker Fax, FlyDoc showcased at booth #1036*

**Madison, WI and Boston, MA, June 12, 2006** – Esker, the leader in business document delivery solutions, will demonstrate its portfolio of software and services at the Microsoft Tech·Ed 2006 event in Boston. As a Microsoft Gold Certified Solution Provider, Esker offer technologies that integrate seamlessly with Microsoft server and desktop solutions to automate paperless delivery of business documents into and out of any Windows application. Users can conveniently send, receive, and manage critical business communications through their standard Outlook or Exchange email boxes and from enterprise systems as well as Microsoft Office applications.

At exhibitor booth #1036 Esker will demonstrate the following solutions:

**Esker DeliveryWare**, the complete platform for end-to-end document process automation. Using patented Esker technology, Esker DeliveryWare captures incoming business data from virtually any source and transports outbound documents via fax and email plus XML, PDF, HTML, print, archive, database, Fax on Demand, Mail on Demand and more.

**Esker Fax**, the versatile desktop and production fax server solution that helps companies automate the distribution of critical documents, increase productivity and reduce document delivery costs up to 90%. In addition to providing a COM-based API and other easy ways to integrate with applications, Esker Fax is the first fax server with an outsource service option, called Fax on Demand, built in for failover and overflow. Esker Fax connects with the highly scalable Esker on Demand Center for automatic routing and delivery via Esker-hosted facilities in the event of local fax equipment failure or during periods of peak fax volume.

**FlyDoc**, the web-based document delivery service that enables desktop users to send fax and physical letters directly out of Microsoft Office applications. FlyDoc provides the benefits of a fax server and a mailroom without the associated capital investment. Electronic documents are delivered directly from the users' desktop applications to the FlyDoc worldwide network of mail and fax facilities, where they are transformed and sent automatically via postal mail or fax. Users can monitor progress via a web interface available 24/7/365 and can call upon live technical support at no additional charge. In addition to significant time savings, on average, organizations using FlyDoc can reduce their out-of-pocket costs for sending traditional mail by as much as 45%, and for transmitting faxes by as much as 90%.

“We look forward to introducing our technology to those who have not thought about document delivery solutions before, as well as bringing existing Esker customers up to speed on the latest enhancements,” said Renee Thomas, Director of Field Marketing, Americas, at Esker. “Tech·Ed is the perfect opportunity for us to show Microsoft users how to automate inbound and outbound document traffic and gain new efficiencies by eliminating manual paper processes.” (more)

## About Esker

Esker is a recognized leader in helping organizations streamline manual, paper-intensive processes and reduce the use of paper by automating the flow of documents into, within and outside the organization. With patented document delivery automation software (Esker DeliveryWare) and hosted document delivery services (FlyDoc), Esker offers a total solution to automate every phase and every type of business information exchange. Customers gain significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months. Founded in 1985, Esker operates globally and has over 80,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin.
