# **Esker Answers Market Need for Quick-to-Implement, Low-Risk Document Delivery Solution for Oracle**

*Esker Business Solution for Oracle allows users to send faxes and emails directly from Oracle applications, provides unique faxing outsource during usage spikes*

**SAN FRANCISCO, CA, Moscone Center, Oracle OpenWorld 2005 – September 19, 2005**—Esker Software, a leading provider of intelligently automated document delivery solutions, today announced the release of its Esker Multi-Channel Document Delivery for Oracle Business Solution at Oracle OpenWorld 2005. At booth #136 at OpenWorld, Esker will offer demonstrations of the solution. The offering is designed to simplify document delivery from Oracle applications, offering a focused, quickly-delivered and risk-free solution for faxing and emailing directly from Oracle applications. Aggressively priced to meet market needs, the solution focuses directly on improving document delivery for Oracle offerings, delivering rapid efficiency gains for immediate additional value with minimal risk. The Esker solution package includes all the elements necessary to quickly implement and configure, including software and license, knowledge transfer, support and maintenance during the first year, as well as free consultation.

“Companies are looking for ways to improve the scalability and efficiency of document processes centering on their Oracle solutions without having to overhaul systems,” said Eric Bussy, Director of Corporate Marketing, Esker Software. “Our solution for automation of Oracle document delivery provides one of the most effective and rapid means by which Oracle users can significantly reduce costs and better utilize resources.”

(more)

With the Esker Multi-Channel Document Delivery Solution for Oracle, companies send and receive fax and email directly from Oracle, increasing speed, accuracy and reliability and allowing companies to save up to 90% on document delivery. Esker is also the only provider of document delivery that allows Oracle users to outsource faxing to hosted servers during peak periods that may otherwise outstrip a company's internal fax capacities.

“Over the past several years, companies have been increasingly interested in better moving documents in and out of their Oracle applications, but found that doing so required significant investment and cumbersome implementations,” said Catherine Dupuy, Product Manager for Esker Software. “In response, we drew from our knowledge and expertise to create a unique offering that gives companies a way to swiftly repair or enhance the automated delivery of the documents generated by their enterprise applications – without hiring programmers or overspending on new infrastructure.”

Esker's approach to developing application and business process-specific document delivery solutions allows companies to immediately identify the solutions they need based on the types of document-driven processes they wish to automate. These solutions are:

- Focused – Designed to fix a specific document delivery problem encountered by an organization.
- Comprehensive – All the elements needed to fix the document delivery issue are included; software and licensing, knowledge transfer, and free consultation.
- Quickly Delivered– Full implementation in less than 2 weeks.
- Risk-Free – Integrates seamlessly with current business applications requiring no programming.

### **Other Esker DeliveryWare Business Solutions**

#### **E-Invoicing Business Solution**

Eliminating paper invoicing, the E-Invoicing Business Solution reduces the cost of delivering invoices by more than 45% and shortens the Day Sales Outstanding (DSO).

#### **Document Formatting Business Solution**

The Document Formatting Business Solution creates professional looking output directly from enterprise applications using automated document formatting. Users can quickly consolidate information from several back-office sources cutting form-development time up to 90%.

#### **Sales Order Processing Business Solution**

The Sales Order Processing Business Solution automates sales orders by extracting order detail directly from any source, such as scanner, fax or email, effectively eliminating processing errors, improving order-fill levels and increasing customer service satisfaction while reducing order processing time up to 80%.

### **Storage and Retrieval Business Solution**

The Storage and Retrieval Business Solution provides companies with the ability to store, search, retrieve and track all documents sent from enterprise applications while reducing costs of manual filing and physical document storage, and ensuring accurate document retention.

### **About Esker Software**

Esker is a recognized leader in helping organizations streamline manual, paper-intensive processes and reduce the use of paper by automating the flow of documents into, within and outside the organization. With patented document delivery automation software (**Esker DeliveryWare**) and hosted document delivery services (**Esker on Demand**), Esker offers a total solution to automate every phase and every type of business information exchange. Customers gain significant and immediate operational efficiencies, cost savings and measurable ROI in as little as three to six months.

Founded in 1985, Esker operates globally and has over 70,000 customers and millions of licensed users worldwide. Esker has global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin.
