Esker Improves Secure Host Access Automation with latest SmarTerm release

Offering unrivalled security and multiple OS compatibility, SmarTerm 12.1.1 steps up another notch with improved automation for SFTP

Madison, WI, September 15, 2005—Esker Software, a leading provider of host access and intelligently automated document delivery solutions, today announced the immediate availability of SmarTerm 12.1.1 terminal emulation software with unmatched security and usability features.

SmarTerm 12.1.1 is a high-performance, productivity-focused solution allowing users to quickly and securely access host data and applications. New features include:

- **Macro support for SFTP**

SmarTerm 12.1.1 allows users to automate file transfers in a secure environment using SFTP. This allows customers to program secure file transfers at night after the host system has processed data and produced reports or files.

- **Windows XP SP2 and 2003 SP1 compatible**

SmarTerm 12.1.1 is Microsoft-certified and fully compatible with the latest Service Packs of the main Microsoft operating systems: SP2 for Windows XP Professional and Home edition, SP1 for Windows 2003 server.

- **Improved silent installer**

Administrators benefit from a more reliable, more robust and easier-to-use interface for easy implementation.

(more)

“Companies need a multi-OS host access solution they can rely on for maximum productivity,” says Hugo Embert, SmarTerm Project Manager at Esker Software. “Customer comments and requests inspired this new release of SmarTerm, which brings an even more powerful set of administrative tools, improves automation and assures compatibility with the latest Microsoft latest operating systems and service packs.”

SmarTerm effectively controls costs and maximizes ROI through centralized management and reduced workstation maintenance, helping to manage operating system evolution, and providing comprehensive, secure solutions to meet complex enterprise host access needs.

SmarTerm is a proven PC-to-host connectivity solution providing precise terminal emulation and offering high-level security features to protect sensitive enterprise host data residing on IBM® mainframe, AS/400® (iSeries™), Unix, Digital VAX/OpenVMS, and Data General systems.

SmarTerm 12.1.1 is available for immediate purchase or upgrade. For details, visit www.esker.com/smarterm.

About Esker Software

Esker is the intelligent document delivery leader, offering solutions that connect people and information. Automating every phase and every type of document delivery, and providing secure access to enterprise host systems, Esker solutions include:
