Tun[®] Plus 12 by Esker enhances security features, adds Windows Server 2003 support

MADISON, Wis., 29 September 2003 – Esker Software, leading provider of host access and information delivery solutions, announces Tun Plus 12. Providing PC-, web-, and thin-client-based access to enterprise host systems, network utilities, and data resources, Tun Plus 12 now adds:

- ◆ Enhanced security. New SFTP (Secure File Transfer Protocol) support enables secure file transfer, and improved SSL security provides true two-tier encryption. These reduce the risk of file interception and ensure that unauthorized users cannot access sensitive data.
- ◆ Windows Server 2003 compatibility. Esker continues its commitment to support the latest operating platforms, ensuring risk-free upgrades for enterprises adding Windows Server 2003.
- ◆ Improved font support. Asynchronous emulations now use the same True Type fonts already used in synchronous emulations, improving the handling of diacritical marks in all supported languages.
- ◆ Complete Windows XP look. Tun Plus includes a complete set of Windows XP icons and graphics.

Says Dave Schram, product manager at Esker, “With these enhancements, IT/IS professionals can be assured that Tun Plus continues to provide secure access to critical systems and keeps pace with evolving infrastructure requirements. As a truly comprehensive solution, Tun Plus will help enterprises maximize returns from their system investments for years to come.”

(more)

Offering emulation of over 30 host types and supporting all leading security protocols—including SSL, SSH, SFTP, SCP, Triple DES, and X.509 certificates—Tun Plus is the leader in enterprise connectivity. Three deployment options also make Tun Plus the industry's most flexible solution:

- ◆ Tun Plus PC-to-Host. Comprehensive access from any PC running Windows XP, 2000, NT, 98, or 95.
- ◆ Tun Plus Web-to-Host. Access through leading web browsers using ActiveX or Java technologies.
- ◆ Tun Plus Multi-User Windows. Complete access for virtually any client type via Citrix and Microsoft Windows Terminal Services.

Flexible Tun Plus license options also give organizations the freedom to change deployments as needs evolve.

About Esker Software

Esker Software solutions connect people and information. Providing access to enterprise host systems and enabling delivery of business information from any enterprise source to any destination, Esker solutions include:

- ◆ Esker DeliveryWare Platform
- ◆ Esker Fax™, Esker Fax for Notes, Esker VSI-FAX®, and Esker VSI-FAX for Notes
