

Esker's Source-to-Pay Solution Suite

Unified finance & procurement starts here

Esker's Source-to-Pay solution suite connects key processes across the S2P cycle, helping procurement and finance teams reduce silos, share information, and manage spend with greater efficiency, visibility, and control.

The Esker advantage

Improved process efficiency

Reduce manual work across procurement, supplier onboarding, and AP, giving teams more capacity to focus on higher-value activities.

Better supplier management & risk mitigation

Centralize supplier information, simplify onboarding, and gain greater visibility into supplier performance, compliance, and risk to build stronger, more resilient supplier relationships.

Lower costs & stronger spend management

Improve spend visibility and sourcing decisions while guiding purchases through approved suppliers and processes to help control costs and reduce unnecessary spend.

Increased visibility & control

Give procurement and finance greater insight into spend, suppliers, and process performance to identify issues earlier and make better-informed decisions.

One suite for stronger control across source-to-pay

Esker brings core S2P processes together in one connected suite, spanning sourcing, supplier management, contracts, procurement, AP, expenses, and payment. Shared information and connected workflows help procurement and finance collaborate more effectively across the buying process.

Sourcing

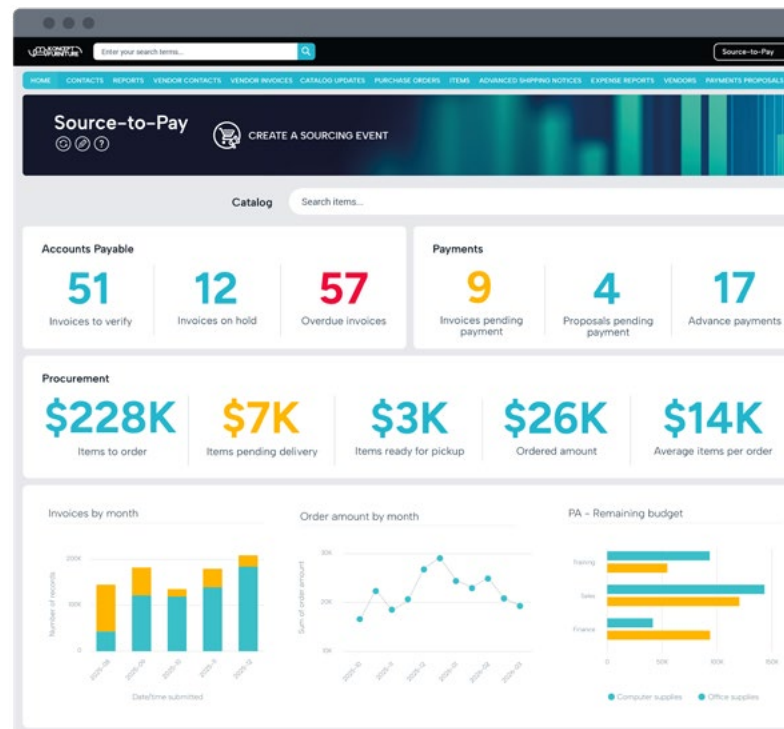

Digitize sourcing events and supplier selection to help procurement teams evaluate options, negotiate effectively, and identify the right suppliers with greater speed and consistency.

Supplier management

Centralize supplier information and simplify onboarding, qualification, and ongoing management to improve visibility into supplier compliance, performance, and risk.

Contract management

Centralize contracts and key information to improve visibility, strengthen compliance, and help teams make better use of negotiated agreements.

Procurement

Simplify purchasing from request through approval and ordering, guiding users toward approved suppliers and buying channels while enforcing purchasing policies.

AP

Automate invoice capture, processing, and approval workflows to reduce manual work and errors while improving efficiency, visibility, and control across AP.

Expense management

Simplify employee expense processing and reduce manual work while giving finance greater visibility and control over company spend.

Payment

Automate payment approvals and execution to improve efficiency, strengthen control, and support secure, timely supplier payments.

Solution features

Esker's 40+ years of field experience and dedication to product development is the key to our continued innovation. Below are some of the most prominent features powering Esker's Source-to-Pay solution suite:

AI embedded across S2P

Esker Synergy AI combines intelligent automation, predictive AI, generative AI, and agentic AI, all embedded directly within S2P workflows. These capabilities help automate repetitive tasks, guide users through decisions, identify exceptions, and move processes forward more efficiently, increasing team capacity while keeping people in control.

Connected platform

Esker brings sourcing, supplier management, procurement, and AP together in one connected S2P platform, helping procurement and finance teams work from shared information and connected workflows.

Visibility, dashboards, & reporting

Esker provides real-time visibility into spend, suppliers, process performance and risk indicators through customizable dashboards, reports, and KPIs. Teams can monitor activity, identify bottlenecks, and analyze trends across S2P processes to make better-informed decisions.

ERP & ecosystem integration

Esker connects with existing ERP and business systems, including complex multi-ERP environments, to modernize S2P processes without disrupting core systems.

Global scalability

Global e-invoicing compliance capabilities and consistent processes help organizations scale S2P operations across entities, countries, languages, and currencies.

Governance & workflow control

Defined policies, approval workflows, and appropriate human oversight help businesses maintain control across S2P processes. These governance capabilities help teams scale automation and AI while maintaining control.

Mobile access & approvals

Esker Anywhere™ helps keep S2P processes moving by enabling managers to review and approve purchase requisitions, supplier invoices, and expenses from their mobile devices anytime, anywhere.

Want to go further?

Esker's Source-to-Pay solution suite is part of a broader vision for intelligent finance operations, connecting S2P, receivables, and customer service processes on one agentic platform. With more than 40 years of experience and over 3,000 customers worldwide, Esker helps the Office of the CFO accelerate cashflow, increase financial visibility and predictability, reduce risk, and modernize operations with confidence. As Synergy AI Agents continue to expand across finance workflows, Esker helps businesses move beyond process automation toward intelligent, governed execution, where people, data, and AI work together to improve working capital performance.
