

# Esker Opens Second US Office in Denver

Expansion indicative of company's growth and focus on the West Coast

**MADISON, WIS. — January 23, 2017 —** [Esker](#), a worldwide leader in [document process automation solutions](#) and pioneer in [cloud computing](#), announced today that it has opened a second U.S. office in Denver. Esker chose to expand into Denver to accommodate growth, enhance recruiting efforts and better serve its clients in the western half of the United States.

In recent years, Esker has seen its customer base in the Rocky Mountain and Pacific states, along with the western region of Canada, grow significantly, especially within the medical device, food production and semi-conductor industries. With a satellite office in Denver now in place, the Esker team is better able to serve these customers. Esker is also well-positioned to accommodate companies that utilize enterprise resource planning (ERP) platforms SAP and Oracle, each of which has a dominant presence along the West Coast, since Esker's solutions enhance and integrate with ERPs.

"Over the past three years, Esker has seen a considerable increase in business out of this region," said U.S. Chief Operating Officer Steve Smith. "In order to maintain our reputation for excellent customer service while growing so quickly, it was crucial that we open a second U.S. location near the West Coast."

In addition to accommodating current and future customers, Esker's expansion into Colorado is a strategic move to facilitate growth within the company. "Denver is an ideal campus for recruiting top talent," said Daniel Reeve, director of field sales and head of the satellite office. "With a great quality of life, solid infrastructure, including an airport hub, and economic growth that surpasses the national average, the city is home to a solid and growing talent base."

In addition to Reeve, the Denver office employs sales representatives and a sales engineer, who provides technical support to the sales team and West Coast customers.

## About Esker

Esker is a worldwide leader in cloud-based document process automation software. Esker solutions, including the acquisition of the TermSync accounts receivable solution in 2015, help organizations of all sizes to improve efficiencies, accuracy, visibility and costs associated with business processes. Esker provides on-demand and on-premises software to automate accounts payable, order processing, accounts receivable, purchasing and more.

Founded in 1985, Esker operates in North America, Latin America, Europe and Asia Pacific with global headquarters in Lyon, France and U.S. headquarters in Madison, Wisconsin. In 2016, Esker generated 66 million euros in total sales revenue. For more information on Esker and its solutions, visit [www.esker.com](http://www.esker.com).
