

Esker's Accounts Payable Automation and Order Management Automation Solutions Now Available on SAP® Store

Singapore, Malaysia and Hong Kong. — August 31, 2021 — Esker, a [global cloud platform](#) and leader in [AI-driven process automation](#) solutions for finance and customer service functions, today announced that its [Accounts Payable Automation](#) and [Order Management Automation](#) solutions are now available on [SAP® Store](#), the digital marketplace for SAP offerings and complementary solutions from SAP partners. Expanding on Esker's over 15-year partnership with SAP, the availability of Esker's solutions on SAP Store will further strengthen the relationship.

SAP Store, found at [store.sap.com](#), delivers a simplified and connected digital customer experience for finding, trying, buying and renewing more than 1,800 solutions from SAP and its partners. There, customers can find the SAP solutions and SAP-validated solutions they need to grow their business. And for each purchase made through SAP Store, SAP will plant a tree.

"We are pleased that our solutions are available on SAP Store, enabling businesses to easily discover and purchase them," said Catherine Dupuy-Holdich, Senior Product Manager at Esker. "This will enable us to expand our reach within the SAP ecosystem, to deliver better results to our customers and accelerate their digital transformation."

The interface software for Esker's Accounts Payable Automation and Esker's Order Management Automation solutions have been SAP certified for integration with SAP S/4HANA® Cloud. By achieving this certification, Esker demonstrates its ability to deliver projects that meet the quality requirements and standards set by SAP. The certification can give businesses confidence that Esker's solutions are enabled to work with their SAP S/4HANA Cloud software and be compatible with future upgrades.

"Today, it is no longer enough to say that a solution integrates with SAP technology, it must be able to demonstrate the impact of that integration," said Aurélien Coq, Product Manager at Esker. "At a time when companies are increasingly sensitive to the way their data is processed, this certification helps to assure customers of the highest quality and expertise."

Esker's partnership with SAP allows the company to continuously improve its solutions. For Esker's customers, this collaboration is also an assurance for the future. "When our customers are ready to migrate to SAP S/4HANA Cloud, we will be there to support them," added Coq.

By complementing ERP systems, Esker's AI-driven automation solutions boost a company's ability to weather difficult business conditions. Recent events and the general drive towards digitalisation will only increase the interest of businesses to optimise and streamline their finance and customer service functions. Having Esker's solutions made available on SAP Store will add another layer of facilitation to the customer experience.

About Esker

Esker is a global cloud platform built to unlock strategic value for finance and customer service professionals, and strengthen collaboration between companies by automating the cash conversion cycle. Esker's solutions incorporate technologies like Artificial Intelligence (AI) to drive increased productivity, enhanced visibility, reduced fraud risk, and improved collaboration with customers, suppliers and internally. Esker operates in North America, Latin America, Europe and Asia Pacific with global headquarters in Lyon, France, and U.S. headquarters in Madison, Wisconsin.
