

# ESKER FAX FOR NOTES 6.0 THE PURE NOTES FAX SOLUTION

While e-commerce communication technologies have proliferated in recent years, fax has remained a predominant day-to-day messaging tool in today's business world. Fax is still the choice whenever business communications require secure, confirmed and immediate delivery, or an exact facsimile of the source document. And for enterprises running Lotus Notes® and Domino™, Esker Fax for Notes will continue to deliver tremendous payback. Fax server automation has replaced fax machines in many enterprises, reliably processing thousands of business documents each day, integrating electronic document distribution with mission-critical business applications, and providing the convenience of faxing from the desktop.

## Full leverage of the Notes/Domino environment

Esker Fax for Notes is the pure Notes® fax server solution from Esker, incorporating the Lotus® interface and Notes-based administration. Implemented completely within the Notes/Domino environment, Esker Fax for Notes becomes an integral part of critical business communication strategies and requires no modifications of your Domino Directory name and address book. With Esker Fax for Notes, enterprises are able to automate faxing of any document from any application immediately – even without a desktop client.

Today's forward-thinking enterprises demand solutions that not only accelerate information delivery but also reduce the cost of doing business. They also want the kind of rich functionality and exceptional reliability that Esker Fax for Notes delivers.

Use this simple formula to calculate how much your organisation spends on manual faxing every year:

Average wage per minute  
x 10  
x Number of faxes sent  
= Total annual fax labour cost

## Esker Fax for Notes means better business

All companies expect cost savings with automated document delivery, such as reduced paper consumption, less equipment maintenance and more efficient use of labour. Significant benefits? Of course. But the biggest benefit – faster time to cash – is often overlooked. Typically, businesses use

Esker Fax for Notes to automate delivery of documents such as purchase orders, acknowledgements, invoices, credit applications, quotes, reports, notifications, invoices and financial statements so they can:

- Reduce document delivery costs up to 90%
- Enable faster information exchange among partners and customers
- Eliminate bottlenecks in communications such as time spent manually entering information into applications or printing, sorting, stuffing and mailing documents
- Reduce the number of manual touch points in document based processes for a shorter, more streamlined sales cycle
- Accelerate time to cash by getting information out faster and more accurately
- Improve the bottom line

## Esker Fax for Notes advantages

- Native integration empowers administrators and users to send, receive, check status and manage faxes entirely within Notes
- Domino Web Access support allowing users to send faxes with the fax request form through a Web client
- Fax preview and Fax approval features offer users and managers tools to reduce manual processes
- Notes-integrated help database for easy navigation
- Fax and email are unified in a single, familiar client for high user productivity
- Deployment is quick and simple with no client software or mail template changes required
- Faxes stay in the Domino environment, taking advantage of Domino's security and administration capabilities
- Inbound routing eliminates manual fax handling, shortens document distribution cycle and protects sensitive information
- Using Domino Designer®, Esker Fax for Notes enables customisation of cover pages for personalised communication

- Full support for Notes-based clustering and load balancing ensures maximum availability, fault tolerance, scalability and performance
- Least cost routing minimises fax transmission costs
- Leverage of Notes databases gives administrators and users an easy-to-use tool for monitoring and controlling fax delivery
