

Solution summary

Esker's Mobile Application

Put an end to process & payment delays

Esker Anywhere™, Esker's mobile application, speeds up processing for purchase requisitions, invoices, expense reports and contracts. It improves efficiency and provides on-the-go accessibility for managers who can easily review and approve spend requests, contracts, or supplier invoices before payment.

Esker Anywhere provides access to the most important metrics and KPIs from the palm of their hand, enabling managers to keep a pulse on their business from wherever they are.

Benefits at a glance

Increase productivity

with on-the-go approval power from your mobile device

Boost source-to-pay (S2P) efficiency

thanks to fewer slowdowns & less effort needed for approval

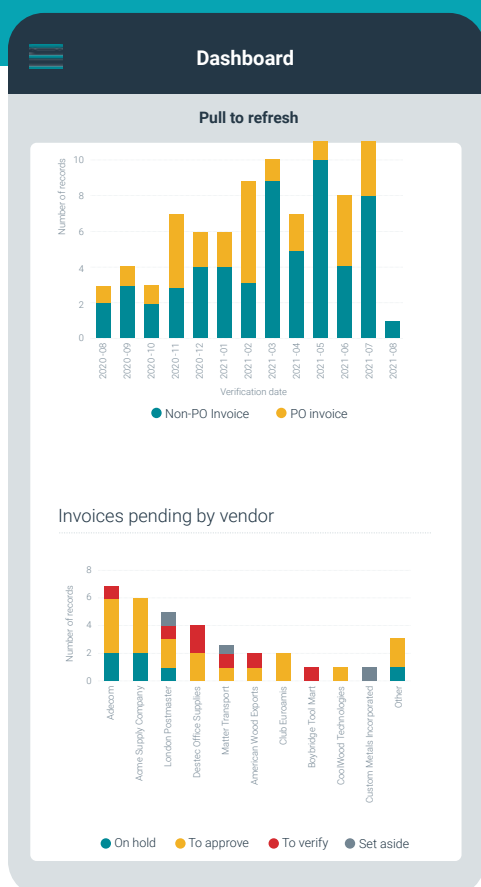

Improve relationships

with your most strategic suppliers thanks to rapid dispute resolutions & accelerated approvals

Enhance visibility

with anytime access to intelligent dashboards displaying real-time business metrics & KPIs

How to get started

1. Download and install the application for free to your Apple® or Android™ device.
2. Log in to the application using your Esker account login credentials.
3. Start approving invoices, purchase requisitions, contracts and expenses on the go right away.

The power of S2P efficiency in your hands

Give your business the tools to achieve greater operational efficiency with less hassle.

Mobile requisition creation & approval

Easily create and submit purchase requisitions, review header and line-item data, budget information, and workflows. Receive real-time notifications to approve, return or reject requisitions.

Mobile order reception

Enable users to validate order reception remotely. Simplify the process and validate goods received in bulk directly from the app. Increase efficiency and improve the order to payment process.

Mobile invoice approval

View images and receive notifications of invoices to approve, hold or return to the requester. Approve several invoices simultaneously, review and change coding information, and leave comments for other users.

Mobile supplier contract approval

View contracts to approve, activate, hold or return to contract author. Receive notifications instantly on incoming new contract approval requests and leave comments for other users.

Mobile expense management

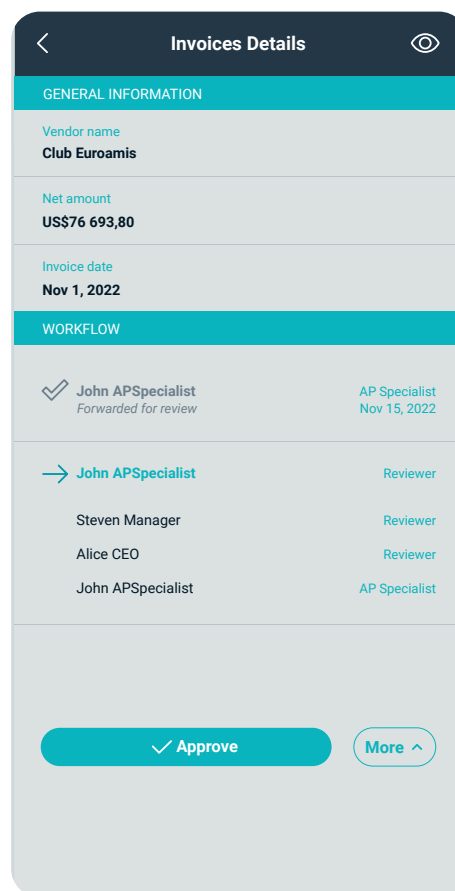

Easily create, submit and approve expense reports on the go. Users simply upload a photo of an expense or forward the email receipt to Esker Anywhere and managers are immediately notified of a new expense report to approve. The app leverages AI for currency recognition, tax code detection and category predictions.

Mobile conversations

Access conversations directly within the mobile app to chat with co-workers, ask questions and solve problems in real time. Stay connected to keep processes moving forward without delays.

Mobile KPIs & metrics

Access important metrics and KPIs on your phone from anywhere. This includes on-the-go availability and visibility into workloads, business trends, and essential functionalities such as: accessing selected dashboards, responsive displays, and the ability to filter graphs or display graph labels.
